SET is a nonprofit medical clinic providing care to the uninsured, under-insured, homeless and Medicaid populations in our community. SET has also joined efforts to help educate, navigate and enroll people into the new health insurance exchange. In the rapidly changing health care and health insurance system, safety-net clinics, like SET, play a huge role in the future of health care. The charges to treat uninsured patients in our local emergency rooms are passed on to the community in the form of higher hospital costs and increased health insurance rates. On average, SET services save the community over \$4.5 million by treating uninsured and under-insured patients who would normally seek non-emergency care at the local emergency rooms.
